Secondary School Certificate
Completed in 2016

About Me

Enthusiastic and adaptable recent graduate, eager to contribute my skills and passion for software development in a dynamic and collaborative work environment. Possess a strong foundation in HTML, CSS, Python & Java, coupled with a keen ability to learn quickly and apply knowledge effectively. A dedicated and detail-oriented individual with excellent communication and problem-solving skills.

Professional Experience

Business web solutions | Full Stack Intern

Understood the management of the entire software development process, from conception to deployment and controlling the whole life cycle of the software and application development process under the direction of professional full stack developers.

Academic Projects

B.Tech Major Project

Title: Depression Detection From Social Media Data Using CNN And Linguistic Metadata Features

Functionality:

- The models are trained based on different word embeddings and compared to a classification based on linguistic data.
- Different models are built using CNN and Logistic Regression.
- It verifies the candidate social media profile and tells us whether the person is depressed or not.

B.Tech Mini Project

Title: An Efficient Framework for Hybrid Recommendation System for Online Travel Agency

Functionality:

- This hybrid recommendation system assists tourists in trip planning and help them to find the information they are looking for.
- The Travel recommendations is based on the idea of destination similarity, such as those based on collaborative filtering and content based recommendation

Certifications

- Introduction and programming with IOT boards
- Matrix Algebra for Engineers
- Java - Codechef
